ecobug® SOLENOID VALVE REDUCED URINAL FLUSH CONTROL SAVES MONEY

Provides flexibility and accuracy

240v AC Mains Operated 15mm Urinal Flush Control - the complete 'fit & forget' solution for exposed cisterns eg those fitted above urinal bowls.

This is our most popular control and has an outstanding record for reliability and long service. Alternative battery operated version available.

- ECA listed and WRAS approved product
- analogue counter for audit analysis
- Simple pushbutton setup procedure
- 6 or 12 hour automatic flushFail safe (normally closed) solenoid valve

The ecobug® Solenoid Valve provides the reduced flush cycle recommended to customers using our ecobug® Extra Strong Urinal Caps

ecobug® SOLENOID VALVE

Technical Specification:

Cistern fill time: 1 to 34 minutes - set by simple pushbutton routine

Flush Program options: Automatic flush 6 or 12 Hour

Solenoid valve: brass latching, 15 mm compression fittings, 2mm orifice, pressure range 0 - 12 Bar with mesh filter (optional low pressure valve for tank fed installations)

M-Unit Power: 240v ac 50Hz 10VA maximum, cable entry through stuffing gland on RHS of enclosure

B-Unit Batteries: 4x Duracell AA cells (supplied) - average life 3 - 4 years, no need to reset when changing. Led flashes to indicate low battery status. Valve closes (fail safe) 2 weeks following initial warning

Test function: By optional Magi-test wand, provides instant full functional test including valve, battery status, Power supply, water supply and cistern fill time

Enclosure: size 135 x 75 x 75mm, (exc. valve) in white RAL 9010
