

HAIR DEGRADER

PRODUCT DESCRIPTION

Ecobug® Hair Degradar utilises enzymes working in synergy with chemical components to break down hair based deposits and unblock drains, providing an effective treatment for clearing shower and bathroom waste pipes blocked with hair, soap and bodyfat.

CORE BENEFITS

- Effective as a maintenance treatment to reduce hair build up and as a shock treatment to get rid of existing blockages
- Easy to use, no need to vacate the area
- Fume free, no aggressive caustic chemicals
- Safer for the end user as well as the environment
- Fast acting, enzymatic action
- Ideal for domestic and industrial use
- Safe on all surfaces

AREAS OF USE

- Drains in sinks and showe

After

Before

HAIR DEGRADER

HOW DOES IT WORK?

Enzyme and chemical technologies work in synergy to open up the hair structure and break it down much more effectively and less aggressively than chemical technologies can achieve in isolation.

Completely removes hair blockages from deep within waste pipes and traps in as little as 3 hours. Fast acting enzymes get to work immediately, resulting in a significant amount of degradation in as little as 30 minutes.

DIRECTIONS FOR USE

Pour 2L of warm water into the plughole before adding 100 – 150 ml of product. Leave to act for at least three hours. We recommend to dose last thing at night. Do not add more water until the following morning or after exposure time of three hours, when a further 2L of warm water should be poured down the plughole.

Stubborn blockages may require repeat applications.

PRODUCT SPECIFICATION

Contains: fresh fragrance, chemical agents and product specific enzymes to specifically target the break down of hair build up and blockages in waste pipes.

PU: 6x1L ready to use
